Education

M. Sc. in Automotive Software Engineering

Oct 2021 - Dec 2025

Technische Universität Chemnitz
Chemnitz, Germany

B. Sc. in Computer Engineering

Aug 2016 - Aug 2020

Gujarat Technological University
Gujarat, India

Experience

Working Student - Full Stack Software Developer

Jan 2025 - Present

Technische universität Munich
Remote, Germany

- Developed and maintained REST APIs to enhance system functionality. Refactored the existing codebase to follow MVC architecture for better maintainability.
- Designed and implement New functionality using PHP 8.3 and Database connection with MySQL.
- I have experience working in an Agile methodology using Git flow, Docker, and CI/CD pipelines.
- Worked with REST APIs, Authentication using OAuth 2.0 and Wordpress CMS.

Master Thesis Carla Simulation Based for Non-Systematic Traffic Vehicles

Jul 2024 - June 2025

Technische universität Chemnitz
Chemnitz, Germany

- Designed a simulation model to identify whether vehicles are manually driven or autonomous using trajectory estimation algorithms with AI, computer vision techniques, and machine learning.
- Applied image preprocessing techniques, trained, and analyzed the model with Python and libraries such as NumPy, OpenCV, Torch, and Ultralytics.
- Used Carla simulation to study and interpret complex traffic behavior, contributing to advancements in autonomous vehicle systems.

Internship - Software Developer

March 2023 - Aug 2023

John Deere
zweibrücken, Germany

- Implementation of control of three sub-systems in the existing mechatronic system.
- Development and implementation of surfaces for the user interface(UI).
- The development of C# programs for controlling the actuators via the machine CAN bus network using vector tool.
- Writing documentation for non-specialist employees.

Software Developer

June 2019 - Sept2021

Nexcode InfoTech
Gujarat, India

- Developed and maintained responsive web pages using HTML, CSS, TypeScript, and Angular, along with the Tailwind CSS framework, focusing on creating seamless user experiences across devices.
- Developed the backend for various internal applications based on Node.js, MongoDB.
- Implemented and maintained RESTful APIs using FAST API framework.
- Worked extensively with Angular to create dynamic and effective components, enhancing both functionality and user interfaces.
- Worked on various tools like Postman, composers, CI/CD pipeline , Docker and Git.

Skills

Advanced Knowledge:	HTML5, CSS3, JavaScript, TypeScript, GSAP, Webpack, React JS, Angular 2+, Vite, Python, PHP 8.3, Vue.js, MySQL, PostgreSQL, RESTful API, Swagger, Git, Wordpress, CMS, Docker, Visual Studio Code, GitHub, GitLab, Agile Methodology, CI/CD Pipeline, PHPStorm, WebStorm, PyCharm, SCRUM
Intermediate Knowledge:	C#, .NET, Node Js, jQuery, MongoDB, Django, Laravel, WebSockets, FAST API, OpenAPI, SQLAlchemy, OAuth 2.0
Basic Knowledge:	Redis, Celery, AWS, cloud Technologies

Projects

IntelliBot

MovieApp

Python Background Job Processing

Resume_Analayzer

HustleHub

Tic Tac Toe Game

Language

English	Advanced knowledge level at C2
German	Beginner knowledge level at A2
Gujarati	Native Language
Hindi	Advanced knowledge level at C2
